## Insured Statement

I left the house Friday evening for a weekend trip and returned on Sunday, August 10. When I entered the kitchen, I found water on the floor around the sink and lower cabinets. I looked under the sink and saw water around the plumbing. My understanding is that a pipe or connection under the sink suddenly failed while I was away.

Before this incident, I had not observed any previous leak or water damage in that area. I was not aware of an ongoing water problem in the kitchen before the weekend. The cabinets and flooring appeared normal to me before I left.

After discovering the water, I shut off the water beneath the sink and contacted a restoration company. I am seeking payment for the resulting damage to the kitchen cabinets, flooring, drywall, and related repairs.

## Statement Notice

This document records the insured's account of events for investigation purposes. Statements in this document have not been independently verified.
